		Read all instructions before disassembly	
	Ra	fer to the illustration on page 1 for component part numbers and tool list	
	ne	The to the mustration on page 1 for component part numbers and tool ist	
		Disassembly	
	Ι.	Remove work support from fixture. Wipe clean to remove	
	2.	external contaminants. With 17mm wrench at plunger (3) and 14mm wrench at	
	L .	contact bolt (I), unscrew contact bolt (I) from plunger (3).	
	2	Remove O-ring (2) from contact bolt (1).	
	3. 4.	Remove contact spring (4) from inside plunger (3). Insert 3 mm hex key into cap screw (18) inside plunger	
в		(3) and unscrew cap screw (18). Remove cap screw (18)	в
	F	and washer (17) from inside plunger (3).	
	5.	Gently slide plunger (3) out from top of work support.	
		Caution: Do not expose work support clamping mechanism (7) located underneath the top cap (6) to any type of cleaning	
		solutions. Removal of top cap (6) or clamping mechanism (7)	
		terminates product warranty.	
	6.	Clamp work support body (9) in vise with bottom side	
	7	facing up.	
	7.	Using Vektek #ATLIOII8 spanner wrench, unscrew bottom cap (8) from work support body (9). Remove	
		O-ring (10) and O-ring (11) from bottom cap (8).	
	8.	Remove work support body (9) from vise.	
	9.	Remove wiper (5) from top cap (6). Be careful not to damage wiper bore or bore below wiper (5).	
	10.	If work support hydraulics are manifold fed from fixture,	
		remove O-ring (12) from manifold port of work	
		support (9) mounting flange (2 places). If work support hydraulics are not manifold fed from fixture,	
		insert 3 mm hex key into plug (13) located at manifold port	
		of work support (9) mounting flange and unscrew plug (13)	
A	12.	(2 places). Remove O-ring (14) from plug (13). Thoroughly clean contact bolt (1), contact spring (4),	A
		plunger (3), cap screw (18), washer (17), bottom cap (8),	
	3	plugs (13) and set aside to dry. Wipe clean bottom cap seal bore and seal face located	
	10.	in bottom of body (9). Wipe clean wiper bore located in	
		top cap (6) at top of work support. Wipe 🛛 💦 😰	1
		clean manifold ports located on body (9) Mounting flange.

## Assembly

1

2

в	<ol> <li>Lubricate new O-rings (2), (10),(11),(12),(14) and outside diameter of new wiper (5) with clean hydraulic oil (Vektek 65-0010-01 or equivalent). Also, apply light film of hydraulic oil to outside surface of plunger (3).</li> <li>Press wiper (5) into top cap (6) taking extra care to install squarely without excess force. CAUTION: IMPROPER INSTALLATION COULD DAMAGE WIPER (5) CAUSING EXCESS WIPER DRAG.</li> <li>Install O-ring (10) and O-ring (11) onto bottom cap (8)</li> <li>Clamp work support body (9) into vise with bottom side facing up.</li> <li>Screw bottom cap (8) into bottom of work support body (9). Using Vektek #ATLIOII8 spanner wrench, torque bottom cap (8) to 74 N-m (55 ft-1b).</li> <li>Remove work support body (9) from vise and position with top cap (6) upward.</li> </ol>	в
A	<ol> <li>Gently install plunger (3) into work support through wiper (5) taking care not to damage wiper (5). Plunger (3) should move freely without binding. Lightly push plunger (3) downward until bottoms.</li> <li>Install washer (17), then cap screw (18) dropping thread side down through top of plunger (3). Insert 3 mm hex key into cap screw (18) and torque to 4.5 N-m (40 in-1b).</li> <li>Insert contact spring (4) into hole through top of plunger (3). Contact spring (4) will pilot onto cap screw (18).</li> <li>Install O-ring (2) onto contact bolt (1).</li> <li>Screw contact bolt (1) into top of plunger (3). With 17 mm wrench at plunger (3) and 14 mm wrench at contact bolt (1) torque to 13.5 N-m (120 in-1b).</li> <li>If work support hydraulics are manifold fed from fixture, install new O-ring (12) into manifold port of work support body (9) mounting flange (2 places).</li> <li>If work support hydraulics are not manifold fed from fixture, install O-ring (14) onto plug (13), insert 3mm hex key into plug (13) and torque to 3 N-m (25 in-1b) (2 places).</li> </ol>	A
