**Dual Path Rotating Unions**

For proper sealing, mating surface must be flat within 0.003 in. with a maximum 32 μ in. Rₐ surface finish.

Operating Parameter Guidelines
- Operating Temperature: 40°-160°F
- Air may be run in any available passage
- Max. RPM see table page I-3

Models 32-2242-03 and 32-2262-03 are not adaptable for manifold mounting.

- Adapter Model No. 30-8711-23 is needed for manifold mounting. Order Separately.
- For manifold mounting models 32-2242-02 and 32-2262-02, order two each adapter 30-8711-23 and discard the plugs. Model numbers ending in 03 are not manifold mountable. See Note.

**Operating Limits**

- Rotational Torque Resistance (in-lb) vs. Input Pressure (psi)
- Speed (rpm) vs. Input Pressure (psi)

**NOTE:** Torque requirements may vary depending on port configuration and pressure run through ports. Testing of your specific application may be required.
